Givaudan – Printing 20M Labels Per Year with Loftware

" Givaudan prints more than **20 million labels per year** across more than 35 manufacturing and distribution sites. This result was achieved with the initial implementation support from Loftware and subsequently with **world-class support and professional services.** I cannot imagine having achieved this result and to be able to continue to support the continued growth that Givaudan has experienced without Loftware as our Enterprise Labeling partner.
