

# Paumac Tubing

## Introduction

This case study of Paumac Tubing is based on an August 2017 survey of Hexagon Manufacturing Intelligence customers by TechValidate, a 3rd-party research service.

“The ROMER Arm has given me more insight and confidence in my manufacturing process.”

## Challenges

The business challenges that led Paumac Tubing to evaluate and ultimately select Hexagon Manufacturing Intelligence:

- Faced the following challenges before partnering with Hexagon Manufacturing Intelligence:
  - A lack of certainty that dimensional stability and quality specifications were met
  - Difficulty comparing CAD models to as-built assemblies
  - Difficulty in accurately aligning parts for assembly
  - Difficulty in reverse engineering parts and components

## Use Case

The key features and functionalities of Hexagon Manufacturing Intelligence that the surveyed company uses:

- Chose the ROMER Absolute Arm for the following reasons:
  - Is easy to use
  - Is portable
- Chose the ROMER Arm over the following:
  - FARO

## Results

The surveyed company achieved the following results with Hexagon Manufacturing Intelligence:

- The first choice for a portable metrology solution was the ROMER Arm.
- Found the ROMER Absolute Arm to be easy to learn when compared to the competition.
- Reduced the amount of time dedicated to inspection tasks with the following:
  - Expert support services
  - The intuitive ergonomic design of the ROMER Arm
  - The speed and confidence of accurate inspection data
- Increased productivity at their facility by >40% using the ROMER Arm.
- The estimated payback for using their ROMER Arm is 1-2 years.
