

5/5 Stars

How our organization uses ALPHACAM:

I use ALPHACAM to do all of the drawing/engineering for the shop and customer paperwork. I also use it to program both my cnc and 5 aixe bridge saw.

Why I recommend ALPHACAM:

I would recommend ALPHACAM because it eliminates the need to have Autocad. I use ALPHACAM like an Autocad to do my drawings. In my business, we are only drawing 2D countertops. I can draw in 3D but it is rare. Instead of having Autocad & ALPHACAM you can do both jobs with one software.
