

5/5 Stars

How our organization uses CABINET VISION:

“ We use CABINET VISION to design all of our kitchens and bathrooms. We also use it to show our customers what their finished product will look like as well as effectively communicating our design goals to the guys building the products in the shop.

Would you recommend CABINET VISION, and if so, why?

“ Yes – I would definitely recommend CABINET VISION. It is easy to realize complicated designs and promote consistency across designs.
