

Daniel Henderson, a CMM Programmer at E. I. DuPont de Nemours and Company, would be very likely to recommend Hexagon Manufacturing Intelligence for this reason:

“ I have worked with PC-DMIS since version 3.2 (around early 2000). I find the metrology software to be stronger than any of the other competitive CMM software and I have been to the Wixom, MI training facility 6 times. The staff has always been very supportive and knowledgeable.
