

John Kraig, a Quality Supervisor at Diversified Machine, would be very likely to recommend Hexagon Manufacturing Intelligence for this reason:

Most companies that I have used in the past to calibrate, or claim they can fix issues that might come up, basically cannot. When something arises that needs repairs or parts, other companies inform me that they cannot do it and to call Hexagon, which will now cost twice the money if I would have contacted Hexagon in the first place. Responsible and trustworthy workers are why I have only used Hexagon over the past 10 years.
