

U.S. Postal Service

Introduction

This case study of U.S. Postal Service is based on an August 2016 survey of NETSCOUT nGeniusONE Platform customers by TechValidate, a 3rd-party research service.

“NETSCOUT solutions best-in-class for Cloud, Virtualization, ITOPS, IoT, and UC&C compared to alternative service assurance solutions.”

“NETSCOUT quickly identifies the root cause of service performance problems and saves millions of dollars by avoiding outages.”

Challenges

The business challenges that led the profiled organization to evaluate and ultimately select NETSCOUT nGeniusONE Platform:

- Utilized the following NETSCOUT solution features for Business Assurance:
 - Automatic discovery of service-delivery components and visualization of all interdependencies
 - Understand current capacity utilization and estimate future needs based on past trends
 - Gain a situational awareness through service-centric dashboards and a top-down approach
 - Contextual analysis for applications and digital services
 - Quickly identify the root cause of service performance problems and anomalous behavior

Use Case

The key features and functionalities of NETSCOUT nGeniusONE Platform that the surveyed organization uses:

- Agrees that the approach most effective for assuring digital initiatives is continuous monitoring and real-time analytics of data flowing over the network.
- Evaluated the following vendors before selecting NETSCOUT as a solution to solve critical service assurance challenges in their Digital Enterprise:
 - CA
 - Riverbed
 - Niksun
 - HP

Results

The surveyed organization achieved the following results with NETSCOUT nGeniusONE Platform:

- Rated the following statement as:
 - NETSCOUT helps measure and manage current IT infrastructure and services: strongly agrees
 - NETSCOUT helps achieve business goals by continuously measuring the performance of services and infrastructure to identify potential problems and plan for the roll-out of new applications: strongly agrees
 - NETSCOUT helps to confidently navigate through changes for one or more of the following: Cloud, Unified Communications, Security, and IoT: strongly agrees
- Rated the following NETSCOUT solutions when compared to alternative solutions for helping to solve service performance problems in their IT infrastructure that use different innovative technologies:
 - nGeniusONE with InfiniStream appliances and nGenius PULSE for Cloud: best in class
 - nGeniusONE with physical and virtual InfiniStream appliances for Virtualization (data center, SDN/NFV): best in class
 - nGeniusONE UC&C monitors for SIP trunking, Call Servers, Voice and Video Performance: best in class
 - nGeniusONE with InfiniStream appliances for IoT infrastructure (edge, core and cloud): best in class
 - nGeniusONE with ASI technology for Continuous Application Deployment performance monitoring: best in class
- Has reduced business risk associated with new digital services and improved service performance by gaining holistic visibility with NETSCOUT solutions by the following:
 - Reduced business risk: 80-100%
 - Improved service performance: 80-100%
- Rated the following payback period in each of the following areas, when using NETSCOUT solutions:
 - Improved customer experience: 0-3 months
 - Operational efficiencies: 0-3 months
 - Support for new business models: 0-3 months
 - Increased collaboration: 0-3 months
