

# US Department Of Homeland Security- Customs & Border Protection

## Introduction

This case study of US Department of Homeland Security-Customs & Border Protection is based on a July 2016 survey of NETSCOUT nGeniusONE Platform customers by TechValidate, a 3rd-party research service.

“NETSCOUT solutions enable superior business insights and decision making by harnessing the full power of IP Intelligence.”

“NETSCOUT solutions help solve challenges related to the complexity of managing digital services at scale and high speed of change. In doing so, NETSCOUT provides Business Assurance by effectively collecting, organizing, analyzing and visualizing superior data.”

## Challenges

The business challenges that led the profiled organization to evaluate and ultimately select NETSCOUT nGeniusONE Platform:

- Utilized the following NETSCOUT solution features for Business Assurance:
  - Automatic discovery of service-delivery components and visualization of all interdependencies
  - Gain a situational awareness through service-centric dashboards and a top-down approach
  - Quickly identify the root cause of service performance problems and anomalous behavior

## Use Case

The key features and functionalities of NETSCOUT nGeniusONE Platform that the surveyed organization uses:

- Agrees that the approach most effective for assuring digital initiatives is continuous monitoring and real-time analytics of data flowing over the network
- Evaluated the following vendors before selecting NETSCOUT as a solution to solve critical service assurance challenges in their Digital Enterprise:
  - CA
  - Splunk
  - Riverbed
  - SolarWinds
  - Extrahop
  - Gigamon
  - AppDynamics
  - NetQoS
  - NetWitness

## Results

The surveyed organization achieved the following results with NETSCOUT nGeniusONE Platform:

- Rated the following statement as:
  - NETSCOUT helps measure and manage current IT infrastructure and services
  - NETSCOUT helps achieve business goals by continuously measuring the performance of services and infrastructure to identify potential problems and plan for the roll-out of new applications
  - NETSCOUT helps to confidently navigate through changes for one or more of the following: Cloud, Unified Communications, Security, and IoT
- Rated the following NETSCOUT solutions when compared to alternative solutions for helping to solve service performance problems in their IT infrastructure that use different innovative technologies:
  - nGeniusONE with InfiniStream appliances and nGeniusPULSE for Cloud: best in class
  - nGeniusONE with physical and virtual InfiniStream appliances for Virtualization (data center, SDN/NFV): significantly better
  - nGeniusONE UC&C monitors for SIP trunking, Call Servers, Voice and Video Performance: significantly better
  - nGeniusONE with InfiniStream appliances for IoT infrastructure (edge, core and cloud): best in class
  - nGeniusONE with ASI technology for Continuous Application Deployment performance monitoring: best in class
- Has reduced business risk associated with new digital services and improved service performance by gaining holistic visibility with NETSCOUT solutions by the following:
  - Reduced business risk: 10-24%
  - Improved service performance: 80-100%
- Rated the following payback period in each of the following areas, when using NETSCOUT solutions:
  - Improved customer experience: 0-3 months
  - Operational efficiencies: 0-3 months
  - Support for new business models: 3-6 months
  - Increased collaboration: 3-6 months
