

# The power of seamless visibility in the hybrid cloud helps deliver America's most convenient banking

## Introduction

This case study of The Toronto-Dominion Bank is based on an October 2020 survey of NETSCOUT nGeniusONE Platform customers by TechValidate, a 3rd-party research service.

## Challenges

The business challenges that led the profiled company to evaluate and ultimately select NETSCOUT nGeniusONE Platform:

- The Toronto-Dominion Bank agrees that NETSCOUT solved cloud migration challenges by:
  - Gaining end-through-end visibility across the cloud, data center, and network edge
  - Improving user experience in a complex hybrid environment
  - Detecting service delivery problems and quickly troubleshooting them
  - Efficiently assuring service performance before, during, and after cloud migration
- The company agrees with the following statements:
  - Lack of visibility into on-prem application dependencies and performance baselines increases the risk of cloud migration
  - Fragmented visibility in the hybrid cloud increases the time required to resolve service issues
- The company agrees Adaptive Service Intelligence (ASI) technology from NETSCOUT is used for analyzing traffic data at the source and is:
  - **The most effective** method of assuring service delivery across any hybrid cloud

## Use Case

- The banking company uses NETSCOUT service assurance solutions for cloud migration for its ability to:
  - Lift-and-shift existing applications and migrate them to the cloud with greater speed and agility
  - Enhance end-user and customer experience with improved network and service availability, reliability, and responsiveness
  - Protect user productivity by providing visibility and intelligence required to solve problems fast
  - Assure the success of data center transformation
- Considers the following **important** for hybrid cloud environments:
  - Discover all service dependencies and quickly troubleshoot application performance issues
  - Monitor and troubleshoot service performance in real-time from a single pane of glass
- Confirmed that the power of NETSCOUT smart data does help their organization effectively manage risk and build applications or services in hybrid cloud environments.

## Results

The surveyed company achieved the following results with NETSCOUT nGeniusONE Platform:

- Confirmed NETSCOUT monitoring and troubleshooting solution reduced MTTR as part of their organization's cloud migration by **50 – 79%**.
- Rates NETSCOUT performance monitoring and troubleshooting **significantly better** against alternative solutions:
  - Visibility across NSX-T and VMware Cloud on AWS or Azure
  - Service monitoring and troubleshooting in hybrid cloud environments
  - Monitoring and troubleshooting VPN services in complex IT environments and protecting end-user experience

### Company Profile

Company:  
**The Toronto-Dominion Bank**

Company Size:  
**Global 500**
