

Consumer Products Manufacturer and Retailer Grupo Boticário Trusts Smart Data for Hybrid Cloud Service Assurance

Introduction

This case study of Grupo Boticário is based on a May 2021 survey of NETSCOUT nGeniusONE Platform customers by TechValidate, a 3rd-party research service.

Challenges

The business challenges that led Grupo Boticário to evaluate and ultimately select NETSCOUT nGeniusONE Platform:

- The NETSCOUT solution is important as part of their cloud migration projects for:
 - end-thru-end visibility and actionable insights during cloud migration
 - post-cloud migration monitoring, troubleshooting, optimization of service performance
- “Day 2” postmigration visibility challenges that are best solved by NETSCOUT solutions for complex hybrid cloud environments:
 - Application performance management
 - Collaboration between the enterprise IT team and cloud service provider
- Top service assurance tools that are important for this organization to solve a new application performance or user experience problem in the hybrid cloud:
 - NETSCOUT
 - Cisco AppDynamics
 - AWS CloudWatch

Use Case

The key features and functionalities of NETSCOUT nGeniusONE Platform that the surveyed company uses:

- Cloud service providers their organization works with:
 - AWS: using it today
 - Microsoft Azure: using it today
- Grupo Boticário agrees with the following statements:
 - smart data is needed premigration to understand service dependencies and application performance baselines
 - insights into service, application, and infrastructure performance requires smart data to achieve user experience objectives during cloud migration
 - monitoring a variety of performance metrics requires smart data postmigration to quickly pinpoint the root cause of problems
 - to reap the full benefits of a hybrid cloud, smart data is needed to optimize service delivery and application performance
- NETSCOUT enables this organization to confidently deploy and secure applications and services across hybrid cloud environments by:
 - **Reducing MTTK** (Mean Time to Knowledge) through a single pane of glass, service-centric dashboards and top-down root cause analysis using nGeniusONE

Results

Grupo Boticário achieved the following results with NETSCOUT nGeniusONE Platform:

- Rates NETSCOUT solution value **better** against alternative solutions for helping to manage risk and assure application performance during cloud migration.
- Rates NETSCOUT Visibility without Borders for cloud migration **extremely valuable** for:
 - visibility on-premises and in the cloud to optimize service performance
 - visibility across an entire distributed infrastructure for actionable insights during workload migration to the cloud

Company Profile

Company:
Grupo Boticário

Company Size:
Large Enterprise
