

## CTO of Ministry of Information and Comm's uses NETSCOUT to reduce Mean Time to Resolution (MTTR) 80% to 100% as part of SecOps DDoS solution

Southeast Asian federal government utilizes  
NETSCOUT Arbor Edge Defense and Arbor Cloud to:

- Effectively stop complex DDoS attacks as efficiently as possible before they impact network, business-critical applications, or services
- Effectively stop state-exhaustion DDoS attacks before they impact stateful network devices such as firewalls, VPN gateways, or load balancers
- Enhance end-user and customer productivity with improved network availability, reliability, and responsiveness
- Improve security posture and faster time to detect and respond to threats on-prem and in the cloud.
