

Security Officer combines NETSCOUT with AWS cloud-based DDoS attack protection service

Large East Asian bank trusts NETSCOUT DDoS attack protection as it strives to be the most trusted lifelong financial partner that innovates with confidence by employing:

- Arbor Edge Defense for stopping inbound and outbound threats at the perimeter
- Arbor Cloud DDoS protection service for stopping volumetric DDoS attacks
- NETSCOUT threat intelligence powered by ATLAS® and ASERT to stay informed of latest cyber threats
- Arbor Managed Services for day-to-day DDoS management and optimized protection
