NETSCOUT's best-in-class monitoring and troubleshooting solution for multi-cloud reduced MTTR by 50% or more

IBM uses NETSCOUT service assurance solutions for cloud migration for it's ability to: (1) "Know before you go" – understand application dependencies on-prem before developing a cloud migration plan; (2) enhance end-user and customer experience with improved network and service availability, reliability and responsiveness; and (3) protect user productivity by providing visibility and intelligence required to solve problems fast.
