

# NETSCOUT nGeniusONE Platform a Complete Business Assurance Solution for Federal Government Agency

NETSCOUT helps a federal government agency process and deliver over 150 billion pieces of mail with the following Business Assurance features:

- Automatic discovery of service-delivery components and visualization of all interdependencies
- Understanding current capacity utilization and estimate future needs based on past trends
- Gaining a situational awareness through service-centric dashboards and a top-down approach
- Obtaining contextual analysis for applications and digital services
- Quickly identifying the root cause of service performance problems and anomalous behavior throughout the service delivery infrastructure
