

City that means business says NETSCOUT best-in-class for service monitoring and troubleshooting in hybrid cloud environments

IT professional at local government strongly agrees that fragmented visibility in the hybrid cloud increases the time required to resolve service issues. On the flip side, agrees that analyzing traffic data at the source is the most effective method of assuring service delivery across any hybrid cloud. Uses NETSCOUT for cloud migration because solution enhances end-user and customer experience through improved network and service availability, reliability and responsiveness.
