Hospitality company drives innovation at sea and innovates with confidence in the hybrid cloud with end-thru-end visibility

★★★★★

5/5 Stars

Reason for rating:

"We absolutely rely on the NETSCOUT platform for our every day operations and planning for the future. As we move more and more of our applications and systems into the cloud, we've leveraged dependency mapping to help us with baselining and discovery of existing traffic flows. NETSCOUT gives us the visibility to be able to see before and after key performance indicators that reduces post-migration complexity which tends to be associated with these types of shifts into the cloud. We'd be sunk without NETSCOUT.
