

Meritus Health

Introduction

This case study of Meritus Health is based on a September 2019 survey of Nozin customers by TechValidate, a 3rd-party research service.

“Based on initial findings Nasal Decolonization protocols have effectively decreased isolation days while simultaneously cutting isolation costs and improving patient satisfaction.”

Challenges

Meritus Health evaluated and ultimately selected a Nozin infection prevention program to address concerns with the following:

- Infection prevention
- Effectiveness of MRSA surveillance
- Better antibiotic stewardship
- Operational efficiencies (i.e., patient flow or throughput)
- Costs

Use Case

Nozin® Nasal Sanitizer® antiseptic is applied to the following populations:

- ICU patients
- MRSA colonized patients
- High risk area patients (history, dialysis, etc)
- Pre-op patients
- Post-op patients

Results

Since implementing the Nozin infection prevention program, Meritus Health has achieved the following results:

- Responsible reduction of MRSA Contact Precautions
- Less time donning and doffing PPE
- Increased patient satisfaction
- Increased staff satisfaction
- Improved antibiotic stewardship
- Cost savings
- Reduced pathogen burden

Company Profile

Company:
Meritus Health

Company Size:
Medium Enterprise

Industry:
Healthcare

Number of Beds:
215

About Nozin

Nozin is the leading brand in nasal decolonization. Designed to improve care, lower infection risk and reduce healthcare costs, Nozin programs utilize Nozin® Nasal Sanitizer® antiseptic with clinically supported infection prevention solutions for healthcare facilities, their patients, and the providers who care for them. Nozin is empowering healthcare professionals in hundreds of hospitals across the U.S.
