

# Erlanger Western Carolina Hospital

## Introduction

This case study of Erlanger Western Carolina Hospital is based on a February 2019 survey of Nozin customers by TechValidate, a 3rd-party research service.

“Patients that are colonized with MRSA no longer have to be placed in Contact Precautions resulting in higher satisfaction. Staff love to use Nozin as well.”

## Challenges

Erlanger Western Carolina Hospital evaluated and ultimately selected a Nozin infection prevention program to address concerns with the following:

- Infection prevention
- Effectiveness of MRSA surveillance
- Better antibiotic stewardship

## Use Case

Nozin® Nasal Sanitizer® antiseptic is applied to the following populations:

- ICU patients
- MRSA colonized patients
- Pre-op patients
- Post-op patients

## Results

Since implementing the Nozin infection prevention program, Erlanger Western Carolina Hospital has achieved the following results:

- Responsible reduction of MRSA Contact Precautions
- Less time donning and doffing PPE
- Increased patient satisfaction
- Increased staff satisfaction
- Improved antibiotic stewardship
- Reduced infections
