

# Abilene Regional Medical Center

## Introduction

This case study of ABILENE REGIONAL MEDICAL CENTER is based on a January 2019 survey of Nozin customers by TechValidate, a 3rd-party research service.

“It’s an amazing product and our clinical staff and patients have really taken to the product. They understand it’s use and Infection Prevention potential.”

## Challenges

Abilene Regional Medical Center evaluated and ultimately selected a Nozin infection prevention program to address concerns with the following:

- Infection prevention
- Effectiveness of MRSA surveillance
- Better antibiotic stewardship
- Operational efficiencies (i.e., patient flow or throughput)
- Costs
- Increase of Patient Satisfaction Scores.

## Use Case

Nozin® Nasal Sanitizer® antiseptic is applied to the following populations:

- ICU patients
- MRSA colonized patients
- High risk area patients (history, dialysis, etc)
- Step-down units
- Pre-op patients
- Post-op patients
- At home family/caregivers

## Results

Since implementing the Nozin infection prevention program, Abilene Regional Medical Center has achieved the following results:

- Responsible reduction of MRSA Contact Precautions
- Less time donning and doffing PPE
- Increased patient satisfaction
- Increased staff satisfaction
- Improved antibiotic stewardship
- Cost savings
- Reduced re-admissions
- Reduced infections
- Increased patient flow (i.e., throughput)
- Reduced pathogen burden

### Company Profile

Company:  
**Abilene Regional Medical Center**

Company Size:  
**Medium Enterprise**

Industry:  
**Healthcare**

Number of Beds:  
**180**

### About Nozin

Nozin is the leading brand in nasal decolonization. Designed to improve care, lower infection risk and reduce healthcare costs, Nozin programs utilize Nozin® Nasal Sanitizer® antiseptic with clinically supported infection prevention solutions for healthcare facilities, their patients, and the providers who care for them. Nozin is empowering healthcare professionals in hundreds of hospitals across the U.S.
