Which of the following use cases are relevant to how you're protecting your environment from outside attacks?
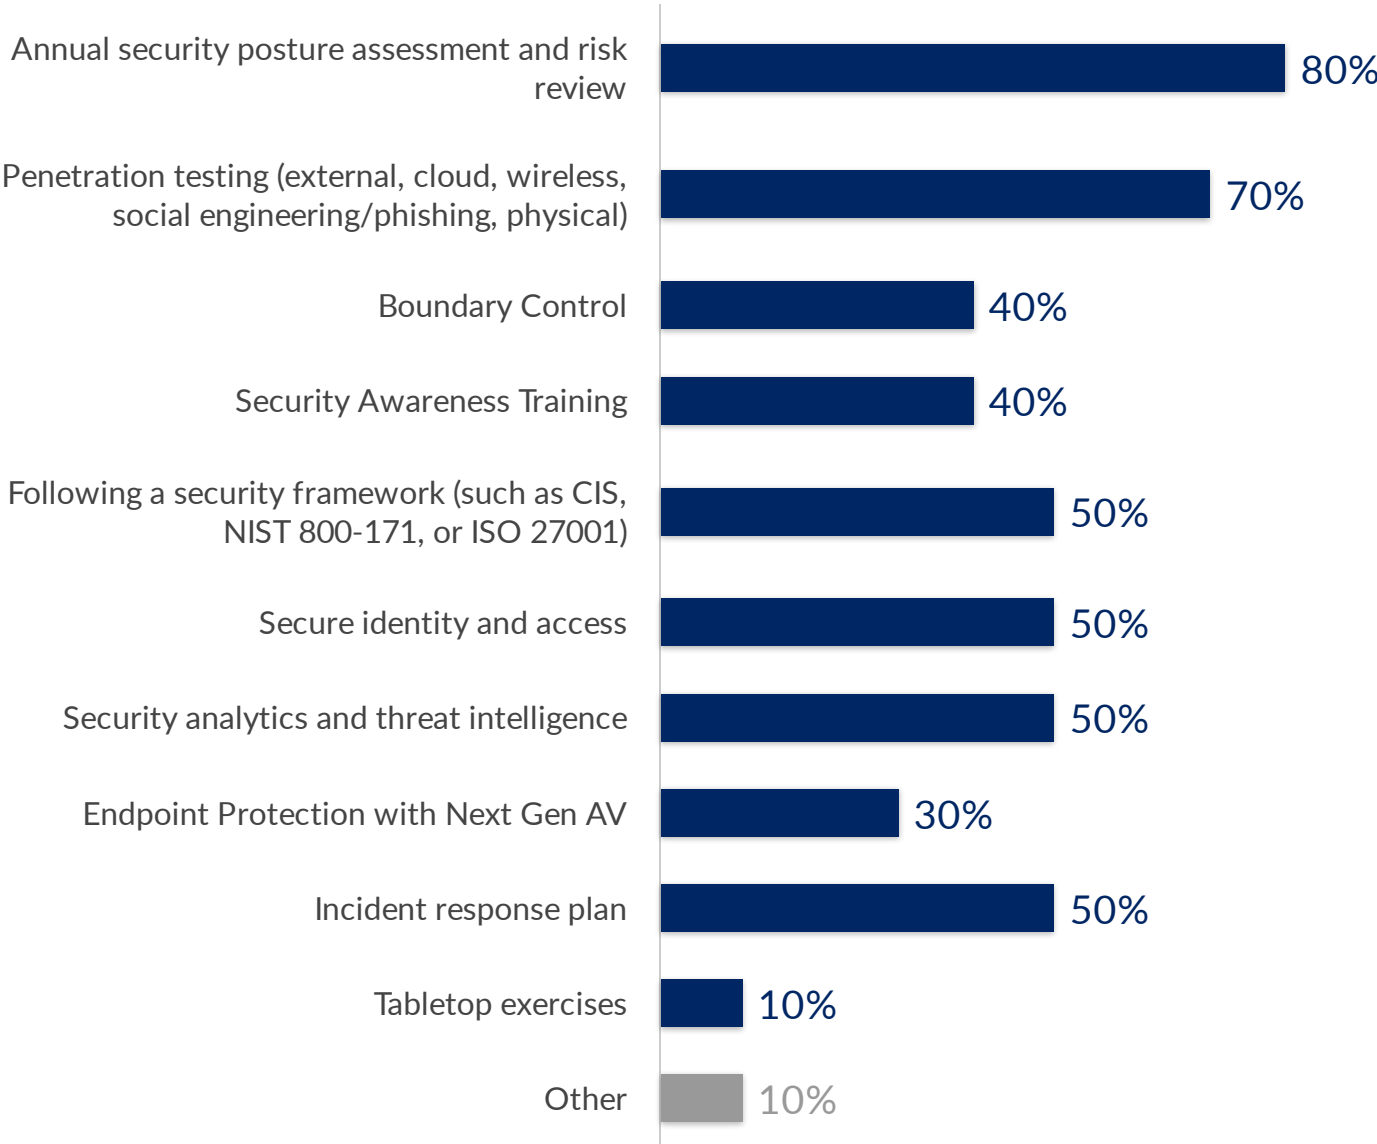

Use Case	Percentage
Annual security posture assessment and risk review	80%
Penetration testing (external, cloud, wireless, social engineering/phishing, physical)	70%
Boundary Control	40%
Security Awareness Training	40%
Following a security framework (such as CIS, NIST 800-171, or ISO 27001)	50%
Secure identity and access	50%
Security analytics and threat intelligence	50%
Endpoint Protection with Next Gen AV	30%
Incident response plan	50%
Tabletop exercises	10%
Other	10%
