

# Computer Software Company Using AngularJS LTS

## Introduction

This case study of a computer software company is based on a January 2023 survey of OpenLogic customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“The support for an end-of-life framework made it possible to be safe (security issues) and gives us more time to upgrade the existing software.”

## Challenges

The business challenges that led the profiled company to evaluate and ultimately select OpenLogic:

- What is your biggest support challenge while using open-source software?
  - Maintaining end-of-life versions
  - Maintaining security policies or compliance
  - Keeping up with updates and patches
  - Not enough personnel

## Use Case

The key features and functionalities of OpenLogic that the surveyed company uses:

- We use support from OpenLogic to:
  - Get after End-of-Life support for AngularJS

## Results

The surveyed company achieved the following results with OpenLogic:

- OpenLogic has enabled them to:
  - Meet internal or customer IT compliance requirements
  - Facilitate an overall open-source risk strategy
  - Address or fix issues with open-source software

### Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Industry:  
**Computer Software**

### About OpenLogic

We believe in the transformative power of free open-source software. It enables anyone to innovate, regardless of budget. As more people actively collaborate on open source projects, the number and quality of free software tools continues to increase, helping to spur even faster advancements across all industries, including health sciences, banking, manufacturing, and technology.
