

We are able to offer a wider portfolio, have access to a plethora of publishers so the look & feel can be diverse as opposed to all the same. Which is a great thing as you can choose your preferences. The platform is straightforward & user-friendly, which is another plus point. Also, I know with confidence that the courses in the OpenSesame Plus catalogue have been vetted to meet a standard. Last but not least – when things go wrong as they sometimes do – the speed in which tickets raised are actioned is superb. It is wonderful to know we have partners who help us to problem solve & continuously look to improve everything (processes/technical hurdles) every day too.
