

Time saved with OpenSesame LMS integration and curation assistance

“ I can find a topic in the catalog and immediately bring it over into our LMS as long as it's part of the Open Sesame Plus subscription, which means our learners don't need to wait to get access to training. I can also have the Curation team pull together a list of trainings in different topic areas without spending my time looking for courses to meet those topics. It's definitely a time saver for me!
