

## Why Cardinal Innovations Healthcare Solutions recommends OpenSesame

5/5 Stars

How our organization uses OpenSesame:

“ We use OpenSesame as our elearning courseware provider. Our learners primarily use OpenSesame when completing web-based courses within our LMS. If there is a problem with a course, I know that customer support will quickly respond with a solution.

Would you recommend OpenSesame?

“ Yes! It's clear that OpenSesame employees enjoy their jobs and the company they work for because **it comes out in the way our organization is treated as a client.** While on-site at my LMS vendor conference I was able to put OpenSesame in touch with an organization that was having some trouble in order to make their experience better.
