

Medium Enterprise Consumer Products Company

Introduction

This case study of a medium enterprise consumer products company is based on a December 2020 survey of Creo Simulation Live customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“When I use Creo Simulation Live, I get more security about the mechanical effects in my designs.”

Challenges

Below are the business challenges that led the profiled company to evaluate and ultimately select Creo Simulation Live. The profiled company

- Wanted to cut the number of iterations of designs
- Needed more certainty that designs met standards

Use Case

The surveyed companies enlisted Creo Simulation Live for the following uses:

*Entire design team implemented the software for day to day work and integrated the software into their workflow

- The design team uses it for most projects/designs

Results

The surveyed company reported the following results.

*Creo Simulation Live met their expectations

*Creo Simulation Live’s structural feature has proven highly valuable to how they work

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Medium Enterprise

Industry:
Consumer Products

About Creo Simulation Live

Creo Simulation Live is ground-breaking technology that performs structural, thermal, modal and fluid analysis on your 3D design in seconds. No more back and forth; no separate environments. Created especially for design engineers, the analysis updates dynamically in real-time as you edit, create new features, or change properties.
