

5/5 Stars

How our organization uses QIAGEN Bioinformatics:

I'm trying to get away from having other people do the data analysis for my projects, so I appreciate the one-stop shopping afforded by CLC. I have targeted sequencing data from two species of mosquito and like how CLC can fetch outside information – a lot of programs are very human genome-centric in how they handle data.

Would you recommend QIAGEN Bioinformatics?

Sure. CLC is easy to use and has plenty of tools to explore and analyze data. I appreciate that the CNV analysis that was formerly part of the Biomedical Genomics program will be rolled into CLC version 12 as a plug in.
