Case Study: Mission Health System

Introduction

This case study of Mission Health System is based on a October 2015 survey of Qlik customers by TechValidate, a 3rd-party research service.

> " **"We have reduced mortality rate for septic patients in our hospital by three PP."**

Challenges

Before implementing Qlik, Mission Health System had too much data and no way of making sense of it. They struggled to connect multiple and disparate data sources, leaving them unable to see the whole story in their data.

The main reasons they picked Qlik were the ability to associate data from multiple sources, and its performance and scalability to large data sets.

Before choosing Qlik, Mission Health System also considered BI solutions from Birst, Domo, Tableau, and TIBCO Spotfire.

Use Case

Qlik is deployed across the enterprise.

Results

One Mission Health System employee says he can't do his job without Qlik. He uses his apps every day to make better decision, making him more valuable to the organization.

Mission Health System have seen several benefits from their use of Qlik, including faster and more confident decision-making, cost reduction, reduced risk, and more cross-departmental use of data. They have also seen that employees who use Qlik are finding new ways to approach business issues.

All in all, Mission Health System estimates that they have improved their decision-making agility by 50% – 74% with Qlik.
