

Case Study: Capio Partners LLC

Introduction

This case study of CAPIO PARTNERS LLC is based on a October 2015 survey of Qlik customers by TechValidate, a 3rd-party research service.

“Multiple departments were able to reduce the time it takes to retrieve data by scheduling QlikView processes and delivering them with QlikView NPrinting.”

Challenges

Before implementing Qlik, Capio Partners lacked a way to easily analyze data. They had difficult connecting multiple and disparate data sources. Simply put, their old BI solution was unable to support their analysis needs.

There were several reasons why Capio Partners picked Qlik:

- It lets them associate data from multiple sources so they can see the whole story within their data
- It’s easy to use and lets them quickly drill down to the underlying data
- They can create intuitive and smart visualizations to represent their data

Before choosing Qlik, Capio Partners also considered BI solutions from Birst, Tableau, and JasperReports.

Use Case

Qlik is deployed across the enterprise.

Results

Capio Partners saw several positive impacts from using Qlik including faster and more confident decision-making, reduced risk, and more cross-departmental use of data. They’ve also seen that employees who use Qlik find new ways to approach business issues.

Capio Partners estimates that they have improved their decision-making agility by > 75% with Qlik.
