

3/5 Stars

Please describe how the Qlik Education training programs helped you be more successful in your job role.

“ The virtual class helped me experience the product exactly how it is installed on my machine. I could complete the practice exercises then ask questions that pertained directly to my system’s capabilities / settings and current code. That’s way better than going to a remote classroom and then trying to repeat the experience back home.

Please describe what you found the most valuable about Qlik Education compared to other software training.

“ It was useful to receive the class manual ahead of time so I could work ahead and prepare questions for class. Otherwise, I don’t think I could have kept up.
