

A CISO, CSO, or similar senior cybersecurity position at a medium enterprise banking company would be very likely to recommend Rapid7 Managed Detection and Response (MDR) Services & Solutions for this reason:

“ First off, the IDR platform is solid; great insight into what is going on in our environment. The MDR service gives us great comfort in knowing we have security engineers keeping a watchful eye on our environment as well as a resource for our internal security group. Having our main advisor/POC for monthly check-in ensures we are getting the most value out of the MDR service.
