

Fortune 500 Financial Services Company

Introduction

This case study of a Fortune 500 financial services company is based on a November 2020 survey of Secure Code Warrior® customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“We have been more effective at meeting organizational security compliance with current industry regulations and guidelines as a result of using the platform.”

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Secure Code Warrior®:

- Existing training was not interactive, contextual, or engaging

Use Case

- Prior to using Secure Code Warrior the organization was using a generic computer-based training solution to train its employees on secure coding. Feedback from their developers revealed that this form training was not interactive, contextual or engaging.

Results

The surveyed company achieved the following results with Secure Code Warrior®:

- Fewer recurring vulnerabilities
- Since implementing Secure Code Warrior, they have accomplished the following:
 - Target skills and knowledge gaps in their team and build a program to address them
 - Releasing code at about the same speed, but with fewer vulnerabilities and rework due to better quality code, with fewer recurring flaws.

As a result of using Secure Code Warrior, reduced/eliminated between 11% – 20% of common code vulnerabilities that were present in their code.

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.
