

5/5 Stars

Compared to your previous solution, how has SolarWinds Backup made your job easier?

“ Compared to our previous solution, SolarWinds’ backup has cut down our admin time of backups by 90%. Our old system used to fail all the time. With SolarWinds, we get a few that fail. With the reporting, this is easy to see and easy to rectify.

Would you recommend SolarWinds n-able, and if so, why?

“ Yes, I would. We use our own local storage and the system is so easy to use. By far the best backup system out there.
