

Case Study: Computer Software Company (Small)

“We purchased SolarWinds DPA on the recommendation of colleague when he learned we needed insights into poor SQL performance.”

“SolarWinds DPA’s focus on wait types is unique. The UI is clean, less cluttered and confusing than other tools I’ve evaluated. Less of a footprint on the monitored servers.”

Challenges

- Purchased DPA to:
 - Improve database performance
 - Improve visibility into the database and the systems that support it
 - Accelerate root-cause identification for performance problems
 - Help database professionals spend less time looking for problems inside the database

Use Case

- Platforms:
 - Windows
- Database engines:
 - SQL Server

Results

- Increased database performance and end user experience
- Improved visibility into their environment and improved collaboration (less finger pointing for troubleshooting)
- Achieved faster problem resolution and more proactive management of databases
- Has the ability to find problems that were hard or impossible to find before

About SolarWinds Database Performance Analyzer

Quickly identify and resolve complex database performance problems—right from code-level issues and query wait time analytics to resource capacity bottlenecks across physical, virtual and cloud environments.
