

## Case Study: United Student Aid Funds Inc.

“I had used DPA in a previous job and when I joined my current employer they were looking for ways to improve performance. There just isn't a better tool than DPA”

“DPA is more intuitive and easier to provide role based access and even share information by emailing direct from the analysis of the queries.”

### Challenges

- Purchased DPA to:
  - Improve end-user response time (application performance)
  - Improve database performance
  - Accelerate root-cause identification for performance problems
  - Improve collaboration between DBAs, developers, operations and other IT teams

### Use Case

- Platforms:
  - Windows
- Database engines:
  - SQL Server

### Results

- Realized the following benefits as a result of using DPA:
  - Saved money on hardware investments as a result of performance optimization
  - Increased database performance and end user experience
  - Improved visibility into their environment and improved collaboration (less finger pointing for troubleshooting)
  - Achieved faster problem resolution and more proactive management of databases
  - Gained time to focus on more important or strategic parts of my job

#### About SolarWinds Database Performance Analyzer

Quickly identify and resolve complex database performance problems—right from code-level issues and query wait time analytics to resource capacity bottlenecks across physical, virtual and cloud environments.
