

Case Study: Large Enterprise Industrial Manufacturing Company

“[DPA] allows us to search through performance history of our systems to find query’s/applications that need to be tuned or improved.”

“[DPA is] great tool to help identify the processes that are taking too long and are impacting our performance.”

Challenges

- Purchased DPA to:
 - Improve end-user response time (application performance)
 - Improve database performance
 - Accelerate root-cause identification for performance problems
 - Monitor overall health of our databases and be alerted when issues arise

Use Case

- Platforms:
 - Windows
 - Linux
 - Solaris/AIX/UNIX
 - VMWare
- Database engines:
 - SQL Server
 - Oracle

Results

- Realized the following benefits as a result of using DPA:
 - Increased database performance and end user experience
 - Achieved faster problem resolution and more proactive management of databases
 - Has the ability to find problems that were hard or impossible to find before

About SolarWinds Database Performance Analyzer

Quickly identify and resolve complex database performance problems—right from code-level issues and query wait time analytics to resource capacity bottlenecks across physical, virtual and cloud environments.
