

SolarWinds DPA Case Study: Bodybuilding.Com

“We purchased SolarWinds DPA for its ability to monitor performance of Oracle Standard Edition databases.”

“Hands down, DPA is the best tool I’ve ever used for Oracle database monitoring.”

Challenges

- Purchased DPA to:
 - Improve end-user response time (application performance)
 - Improve database performance
 - Improve visibility into the database and the systems that support it
 - Accelerate root-cause identification for performance problems
 - Help database professionals spend less time looking for problems inside the database

Use Case

- Platforms:
 - Linux
- Database engines:
 - Oracle
 - MySQL / MariaDB / Percona
 - Mongo DB

Results

- Realized the following benefits as a result of using DPA:
 - Saved money on hardware investments as a result of performance optimization
 - Increased database performance and end user experience
 - Improved visibility into their environment and improved collaboration (less finger pointing for troubleshooting)
 - Achieved faster problem resolution and more proactive management of databases
 - Gained time to focus on more important or strategic parts of my job
 - Has the ability to find problems that were hard or impossible to find before

About SolarWinds Database Performance Analyzer

Quickly identify and resolve complex database performance problems—right from code-level issues and query wait time analytics to resource capacity bottlenecks across physical, virtual and cloud environments.
