solarwinds

Case Study: Medium Enterprise Health Care Company

"The need to monitor and set alerts on multiple DBMS platforms including Sybase. At the time we were relying on home grown scripts running from multiple hosts. We were tasked of coming up with a universal tool to do it all."

"We analyzed all the products in the Gartner Magic Quadrant and Ignite proved to be the best match for our goals."

Challenges

- Purchased DPA to:
  - Improve visibility into the database and the systems that support it
  - Accelerate root-cause identification for performance problems
  - Monitor overall health of our databases and be alerted when issues arise
  - Help database professionals spend less time looking for problems inside the database

Use Case

- Platforms:
  - Windows
  - Solaris/AIX/UNIX
  - VMWare
- Database engines:
  - SQL Server
  - Oracle
  - Sybase

Results

- Realized the following benefits as a result of using DPA:
  - Increased database performance and end user experience
  - Improved visibility into their environment and improved collaboration (less finger pointing for troubleshooting)
  - Achieved faster problem resolution and more proactive management of databases
  - Gained time to focus on more important or strategic parts of my job
  - Has the ability to find problems that were hard or impossible to find before

About SolarWinds Database Performance Analyzer

Quickly identify and resolve complex database performance problems— right from code-level issues and query wait time analytics to resource capacity bottlenecks across physical, virtual and cloud environments.
