

Case Study: Medium Enterprise Insurance Company

FF

“Oracle’s tuning and diagnostic pack was outrageously expensive. Ignite was deliciously simple, useful and a steal at that price!”

“Because Ignite stores this information in a repository outside of the target database, it makes analyzing and looking at history independent of the database you are looking at.”

Challenges

- Purchased DPA to:
 - Improve database performance
 - Improve visibility into the database and the systems that support it
 - Accelerate root-cause identification for performance problems
 - Monitor overall health of our databases and be alerted when issues arise
 - Help database professionals spend less time looking for problems inside the database

Use Case

- Platforms:
 - Windows
 - Linux
 - VMWare
- Database engines:
 - SQL Server
 - Oracle
 - MySQL / MariaDB / Percona
 - Mongo DB

Results

- Realized the following benefits as a result of using DPA:
 - Increased database performance and end user experience
 - Achieved faster problem resolution and more proactive management of databases
 - Gained time to focus on more important or strategic parts of my job

About SolarWinds Database Performance Analyzer

Quickly identify and resolve complex database performance problems—right from code-level issues and query wait time analytics to resource capacity bottlenecks across physical, virtual and cloud environments.
