5/5 Stars

What is the biggest benefit of using SolarWinds DPA?

" I was immediately impressed with SolarWinds DPA's ability to find slow performing SQL that I had never noticed before. Being able to tune small problem areas has brought visible improvement to overall database performance.

How would you describe SolarWinds DPA to a colleague?

" An excellent visual performance analysis tool that immediately charts the largest performance problems. The ability to drill down from a SQL statement to the program/user/machine/file/etc is very impressive and helpful.
