SolarWinds Database Performance Analyzer Customer Review

★★★★½

4.5/5 Stars

What is the biggest benefit of using SolarWinds DPA?

" I'm able to see all systems at once at a glance. If there are problems they jump out at me. Previously I would have to log in to the Enterprise Manager for each system to see if there were problems.

How would you describe SolarWinds DPA to a colleague?

" Useful tool for diagnosing and detecting problems with the database.
