# SolarWinds Database Performance Analyzer Customer Review

★★★★★

5/5 Stars

What is the biggest benefit of using SolarWinds DPA?

" DPA is a great tool with small imprint. It is easy to install and configure (15 minutes) and it is collecting performance information.

How would you describe SolarWinds DPA to a colleague?

" DPA is the best tool out there for determining database wait time issues. It is easy to install and configure, self maintaining for historical metrics cleanup, and very logical drill-down capabilities. It also has great reports available, as well as out of the box alerts with the capability to write your own alerts.
