

# Texas Research Foundation Case Study

## Introduction

This case study of a foundation is based on a March 2019 survey of SolarWinds Government customers by TechValidate, a 3rd-party research service. The profiled organization asked to have their name blinded to protect their confidentiality.

“Server & Application Monitor provides great flexibility and insight for monitoring our servers and their applications.”

## Challenges

The business challenges that led the profiled organization to evaluate and ultimately select SolarWinds Government:

- IT challenges their agency faced prior to implementing SolarWinds products:
  - Lack of visibility into system/server health
  - Lack of visibility into application or database performance

## Use Case

The key features and functionalities of SolarWinds Government that the surveyed organization uses:

- Regular user in the following SolarWinds product areas:
  - Systems, applications, servers, and storage monitoring
- Uses SolarWinds products in the service / on the site
- Agency use cases for leveraging SolarWinds products:
  - Monitoring the integrity of systems/servers
  - Monitoring the integrity of applications and databases

## Results

The surveyed organization achieved the following results with SolarWinds Government:

- Results they were able to produce using SolarWinds products:
  - Improved system and application monitoring and troubleshooting
  - Providing better service levels to the organization
  - Improve log tracking and management
- Favorite SolarWinds products:
  - Server & Application Monitor
  - IP Address Manager
  - Kiwi Syslog Server
- Purchased their SolarWinds products because of:
  - Prior use of other SolarWinds products
  - Scalability / Able to support our growth

### Organization Profile

The organization featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.
