

# Arizona Local Government Case Study

## Introduction

This case study of a state & local government is based on an October 2020 survey of SolarWinds customers by TechValidate, a 3rd-party research service. The profiled organization asked to have their name blinded to protect their confidentiality.

 “NPM, NCM, and IPAM are the ones I use most often and they help with current and potential issues.”

## Challenges

The business challenges that led the profiled organization to evaluate and ultimately select SolarWinds:

- IT challenges their agency faced prior to implementing SolarWinds products:
  - Lack of visibility into the problems leading to network performance or capacity issues
  - Not having the tools to troubleshoot network problems or outages
  - Lack of visibility into system/server health
  - Difficulty assessing and remediating our vulnerabilities
  - Difficulty planning for network and datacenter modernizations

## Use Case

The key features and functionalities of SolarWinds that the surveyed organization uses:

- Regular user in the following SolarWinds product areas:
  - Network management
  - Security and compliance
- Agency use cases for leveraging SolarWinds products:
  - To monitor network performance
  - To troubleshoot network problems or outages
  - To resolve configuration issues
  - To monitor system/server health
  - To monitor security incidents and vulnerabilities and improve compliance
  - To plan for network and datacenter modernizations
- They deploy SolarWinds to monitor 1,001-5,000 objects.

### Organization Profile

The organization featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Organization Size:  
**State & Local**

Industry:  
**Government**
