

# Canadian Government Case Study

## Introduction

This case study of a national government agency is based on a September 2020 survey of SolarWinds customers by TechValidate, a 3rd-party research service. The profiled organization asked to have their name blinded to protect their confidentiality.

“Our favorite SolarWinds product is Network Configuration Manager.”

## Challenges

The business challenges that led the profiled organization to evaluate and ultimately select SolarWinds:

- IT challenges their agency faced prior to implementing SolarWinds products:
  - Lack of visibility into the problems leading to network performance or capacity issues
  - Not having the tools to troubleshoot network problems or outages
  - Lack of visibility into system/server health

## Use Case

The key features and functionalities of SolarWinds that the surveyed organization uses:

- Regular user in the following SolarWinds product area:
  - Network management
- Uses SolarWinds products across whole organization
- Agency use cases for leveraging SolarWinds products:
  - To monitor network performance
  - To troubleshoot network problems or outages
  - To monitor system/server health

## Results

The surveyed organization achieved the following results with SolarWinds:

- Results they were able to produce using SolarWinds products:
  - Improve configuration management
  - Improve system and application monitoring and troubleshooting
- Favorite SolarWinds products:
  - Network Configuration Manager
  - Engineer’s Toolset

### Organization Profile

The organization featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Organization Size:  
**National**

Industry:  
**Government**
