

US Army Research Laboratory was able to produce the following results using SolarWinds' products:

- \*Correlated network, server, and application issues to resolve performance problems
- \*Improved resolution rates for networking issues
- \*Improved configuration management
- \*Improved log tracking and management
- \*Provided better service levels to the agency
- \*Deployed network changes faster with less risk
- \*Improved security and reduced threat vulnerability
- \*Increased productivity of IT staff
