

SOLARWINDS NETWORK CONFIGURATION MANAGER CASE STUDY

Large Enterprise Professional Services Company

Introduction

This case study of a large enterprise professional services company is based on an August 2015 survey of SolarWinds Network Configuration Manager customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

Challenges

The business challenges that led the profiled company to evaluate and ultimately select SolarWinds Network Configuration Manager:

- Problems experienced prior to using SolarWinds Network Configuration Manager (NCM):
 - Experienced configuration changes took too much time and/or were error prone
 - Needed a better way to backup and restore configuration files

Use Case

The key feature and functionality of SolarWinds Network Configuration Manager that the surveyed company uses:

Company manages up to 500 devices.

Results

The surveyed company achieved the following results with SolarWinds Network Configuration Manager:

- Primary reasons for using NCM:
 - Configuration backup and restore to provide operational continuity
 - Search to find where specific configuration policies are used across the network
- Primary benefits from using NCM:
 - Saves time making configuration changes
 - Makes fewer errors when making standardized configuration

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size: Large Enterprise

Industry: **Professional Services**
