

Large Enterprise Health Care Company

Introduction

This case study of a large enterprise health care company is based on an August 2015 survey of SolarWinds Network Configuration Manager customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

Challenges

The business challenges that led the profiled company to evaluate and ultimately select SolarWinds Network Configuration Manager:

- Problems experienced prior to using SolarWinds Network Configuration Manager (NCM):
 - Experienced configuration changes took too much time and/or were error prone
 - Needed to know when configuration changes were made and/or prevent unapproved changes
 - Wanted a faster and easier way to do compliance audits

Use Case

The key feature and functionality of SolarWinds Network Configuration Manager that the surveyed company uses:

- Company manages 2500 devices or more.

Results

The surveyed company achieved the following results with SolarWinds Network Configuration Manager:

- Primary reasons for using NCM:
 - Configuration monitoring to know when and how configurations have changed
 - Network automation to eliminate errors and add speed and consistency to all configuration changes
 - Configuration auditing to more easily and quickly perform policy compliance audits
 - Configuration backup and restore to provide operational continuity
 - Device end-of-life to determine and plan around device end-of-support and end-of-life
 - Search to find where specific configuration policies are used across the network
 - Security scanning to identify potential vulnerabilities in network devices and configurations
- Primary benefits from using NCM:
 - Saves time making configuration changes
 - Makes fewer errors when making standardized configuration changes
 - Monitors configuration changes and fix configuration problems faster
 - Makes the network devices (and the network) more secure
 - Plans and executes hardware replacement upgrades more efficiently
- Saves up to 100 hours each month managing network configurations by using NCM.
- Is up to 75% more efficient at managing and implementing reliable network changes since deploying NCM.
- Is up to 100% faster at detecting and or fixing network configuration problems since using NCM.
- Agrees that they achieve far superior security and network reliability when they use network automation alongside their network monitoring solution.

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.

Company Size:
Large Enterprise
