

Case Study: S&P 500 Industrial Manufacturing Company

“SolarWinds portfolio provides easy to use tools that help in managing network information in an efficient way. SolarWinds also provides a user friendly interface that helps in showing infrastructure information to business and other non-technical people.”

Challenges

- The following problems led them to evaluate SolarWinds network monitoring products:
 - Lack of visibility into problems leading to network outages
 - Issues taking too long to identify and fix bandwidth utilization issues
 - Lack of integration across products from different vendors for monitoring their network, servers, applications, and more (looking to consolidate)

Use Case

- Used the following network monitoring products before switching to SolarWinds:
 - WhatsUp Gold
- Actively monitors over 1000 network devices with SolarWinds.
- Use the following SolarWinds products:
 - Network Performance Monitor
 - NetFlow Traffic Analyzer
 - Network Configuration Manager
 - Server and Application Monitor

Results

- Realized the following results with SolarWinds network monitoring products:
 - Improved MTTR for networking issues
 - Increased productivity
 - The ability to provide better service levels to the business

About SolarWinds Network Monitoring

SolarWinds delivers powerful, affordable, and easy-to-use network monitoring and management software to help you take control of your network, reduce outages, manage devices and speed up troubleshooting.
