

Community Health Association of Spokane

Introduction

This case study of Community Health Association of Spokane is based on a December 2017 survey of SolarWinds NetFlow Traffic Analyzer customers by TechValidate, a 3rd-party research service.

“My favorite feature of NTA is being able to drill down into charts to pinpoint bandwidth hogs.”

Challenges

The business challenges that led the profiled company to evaluate and ultimately select SolarWinds NetFlow Traffic Analyzer:

- Identifying the cause of bandwidth spikes
- Troubleshooting application performance issues
- Viewing traffic patterns to optimize policies
- General network troubleshooting

Use Case

The surveyed company uses the following SolarWinds network management products:

- Network Performance Monitor (NPM)
- NetFlow Traffic Analyzer (NTA)
- Network Configuration Manager (NCM)
- User Device Tracker (UDT)
- IP Address Manager (IPAM)

Results

The surveyed company achieved the following results with SolarWinds NetFlow Traffic Analyzer:

- Gets to the root cause of a bandwidth issue twice as fast since using NetFlow Traffic Analyzer versus using no flow analysis tool.

Company Profile

Company:
Community Health Association of Spokane

Company Size:
Small Business
