

5/5 Stars

How our organization uses SolarWinds Network Configuration Management:

We use NCM to automatically back configurations, check configurations for errors, or comparison to other configurations.

Would you recommend SolarWinds Network Configuration Management?

I would recommend NCM to any network administrator, simply for the power and control it gives you over managing many, many devices. You can use as little or as many of the features as you like and you will still sit back and say to yourself, Wow, that's cool! You just need to try it to see yourself.
